

What we provided:

- ◇ Full site survey and feasibility study
- ◇ 3x dual socket 7kW Ensto smart chargers
- ◇ MyEVS Charging Management Platform

Project Details:

MyEVS were selected by the Kingston Hospital NHS Foundation Trust to support the transition of 3 of their occupational therapy vans to electric. MyEVS provided a turnkey solution for the trust, from an initial site survey and feasibility assessment, to supply, installation and management.

A total of 3 dual socket 7kW Ensto Smart charge points have been installed in the Estates Car Park to provide charging for the electric fleet vehicles. Kingston Hospital NHS Foundation Trust have been able to monitor their energy usage and charging behaviour through the MyEVS Charging Management Platform. Concerns around future building development and the increased electrical load created will also be resolved by the MyEVS charging management platform through its load management capabilities.
